

**In the cloud...**

# Introducing **WebVMS2**

Data Signs' WebVMS2 ushers in a new era of online fleet-management software, based on our customer feedback and new technologies becoming available. WebVMS2 is truly a cloud-based technology offering full redundancy and security while seamlessly enabling you to monitor and program messages on your Data Signs' products from anywhere with any internet-enabled device (such as a tablet or mobile phone). No ongoing fees with Data Signs! What sets this web-based software apart is the ease-of-use:

- Log in and you can view the status of all your Data Signs' products in an instant.
- Click through to create a new message for your Sign and you are ready to go; no science degree required!

## Highlights

- Label each Sign quick on Sign List tab
- Create your own Animations with VMS Animator
- Reliable and fast-loading
- **NO ONGOING FEES!**

## Purchase Options (Requires RM.32B)

- Display Time and Temperature
- Display Lost Time Injury (LTI) data
- Car Counting Interface (requires Radar unit)
- SnapCam™ - coming soon!
